## Keynote Proposal

“Successful Ethical Decision Making:  
Tools to Build Confidence and Unleash Creativity”

## Abstract

Based on a textbook I published in 2007, this program provides a methodology for confidently making better decisions. I offer a three step process based upon the duties of the fiduciary that will empower participants to be more creative, more innovative and more productive.

This keynote and/or workshop will not only empower individuals and teams to make ethical decisions, but inspire a willingness to express new ideas and solutions.

*"This [program] gives you a simple, yet effective, step-by-step process to help you solve problems, make decisions, and be more successful in life."*

– Greg B., Director, Corporate Accounting

## Learning Outcomes

1. Understand how our approach to making decisions defines our ability to innovate and lead with confidence.
2. Learn the three duties of the fiduciary and how they can be applied outside of a fiduciary relationship.
3. Learn how to apply the fiduciary process to daily decision making.

## Program Format Options

- This is a one hour program that can be customized to include an extended meet and greet, or a question and answer session.
- Workshop/Breakout Session Option includes interactive session with accompanying workbook.
